English Building Room 304  The TVs & AV Cabinet

SUMMARY  Use the TV remote for the TVs & volume, and use the touch pad to select a source. You can display items plugged into the black wall plate, and if you have been given access, you can display the black AV cabinet components. You can also display to the projector from here, or to here from the projector podium. Each TV also has its own independent, silver HDMI plate that displays ONLY to that TV.

DISPLAY OPTIONS
For now use the TV remote to power the TVs ON/OFF and to adjust the VOLUME. Use the touch pad to choose inputs:

- **Black Plate HDMI/VGA**: It auto-detects HDMI or VGA.
- **Apple TV**: You need a password for AirPlay use. It’s in the cabinet—but you can display the podium Apple TV, too.
- **PC & Consoles**: These are locked in the black cabinet, but only people with permission may access them.
- **Podium**: Display items from the podium. But first go to the podium and select the source you want to show.
- **Silver Plate HDMI**: Use the TV remote to select HDMI 2 input.

AUDIO CONTROLS
- **All inputs**: Use the TV remote for now. Eventually the touch pad will control volume.
- **PC & laptops**: right-click the volume icon in the lower right corner of your screen. Turn it up/down, or mute/unmute it.
- **Microphone & Assistive Listening**: To use these, go to the podium and follow instructions there. You MUST send the cabinet content to the podium for it to work.

PERSONAL DEVICES
There are a few ways to display a personal device:

- **HDMI or VGA cable**: Locate a cable—they may be in the top drawer of the white cabinet. Plug your device into the wall plate. You may also need to press your device’s function button for external displays, or go to the display settings to tell it to use the projector. You can make it mirror your device or be an extended desktop. Remember the silver HDMI plates only display to the closest TV.
- **AirPlay on the Apple TV for iOS or OS X**: You can wirelessly display your Apple products if your device is AirPlay-enabled. From the lock screen (before the app screen) of an iPad or iPhone, swipe up. Then locate AirPlay and enter the passcode when prompted on the TVs.
